**Study Title:**

Efficacy of photobiostimulation by low level laser therapy and broad band ultraviolet B radiation on fatigue and cognitive function of patients with relapsing remitting multiple sclerosis.

Dear Authors,

Your study protocol has been reviewed and approved by the Research Ethics' Board. You may now proceed with your research as this approval applies from its date.

Please note that you must notify the Committee immediately in the event of any adverse effects on participants or of any unforeseen events that might affect continued ethical acceptability of the study.

**With Regards,**

**Prof . Dr. Amira El-Tohamy**

**Chair of Research Ethics Committee**
